

Carbon Monoxide / Poisonous Gas Alarm

The Carbon Monoxide / Poisonous Gas Alarm located outside the kitchen back door beside the boiler room, can be tested by pressing and holding the Test/Reset button for 1 second.

The sounder should sound as soon as the button is pressed, and the Alarm LED will illuminate red in the test.

If the Carbon Monoxide Alarm detector chirps once per minute the batteries are becoming low and needs replacing within 30 days.

WARNING: A loud alarm is a warning that unusually high and potentially lethal levels of carbon monoxide are present.

NEVER IGNORE THIS ALARM, further exposure can be fatal. Immediately check residents for symptoms of carbon monoxide poisoning. There is a minor injury unit at the hospital at the top of Porthpean Road, or call 999 or 111 for advice.
